

## MU.SA.SA

Museo de la Sábana Santa Molango de Escamilla Hidalgo, México in Spanish.

The Mexico-based Shroud Museum in the state of Hidalgo, municipality of Molango de Escamilla was created with much enthusiasm. It was exactly on April 2, 2023 when it was the inauguration to open the doors to the general public. Thanks to the collaboration of different people and dependencies, the first edition of the museum was achieved. For two years the Castro Corona brothers have been dedicated to the investigation of this impressive piece of research, Eng. Luis Jesús Castro Corona dedicated himself to collecting scientific and historical information in order to make it noticeable to the general public, while Daniela Lizbeth Castro Corona and Jessica Lizeth Castro Corona dedicated themselves to the organization of said museum. Inside the museum, objects made by Molanguense hands stand out, including a reproduction of the "man of the Shroud" found in Italy, made by the sculptor Lino Juárez, as well as nails by the blacksmith Maximino Castro Ramírez, helmet of thorns, flagellum, Jewish burial, and sketches by Engineer Luis Jesús Castro Corona related to the Shroud. Several people came to visit the museum from April 3 to 7, and they provided positive comments to the museum. It is intended to open the museum in the following Easter 2024 and complement said museum year after year.
